Poly-Crete Natural SL comes standard as “Natural Base.” Pigment options can be added per project need.

NOTE: These colors are unique to Poly-Crete Natural SL and should not be used as a reference for standard Poly-Crete colors.

Differences in chemical composition, thickness, application methods and jobsite conditions may cause slight variations of individual colors. Colors may also be affected by age, heat and exposure to ultraviolet light from natural sunlight and overhead lighting (non-UV stable products). Dur-A-Flex recommends obtaining an actual color sample of the floor system for best representation.
